PROFESSIONAL SUMMARY

Android Developer with 4+ years of experience building production Android applications using Kotlin, Jetpack Compose, MVVM, Clean Architecture, Hilt, Koin and REST APIs. Experienced in AI-powered applications, media applications, Google AdMob, Firebase, Google ML Kit and Play Store deployment. Strong in Android architecture, UI development, API integration, performance optimization and production issue resolution.

TECHNICAL SKILLS

Languages: Kotlin, Java

Android: Android SDK, Jetpack Compose, XML, Material Design, Navigation Component, Android Architecture Components

Architecture: MVVM, Clean Architecture

Dependency Injection: Hilt, Koin

Networking: Retrofit, REST APIs, JSON

Database & Storage: Room, DataStore, SQLite, MediaStore

Google Services: Firebase, Google AdMob, Google ML Kit, Firebase Remote Config

Media: MediaPlayer, ExoPlayer, MediaSession

Async: Coroutines, Flow, LiveData, WorkManager

Tools: Android Studio, Git, GitHub, Gradle

PROFESSIONAL EXPERIENCE

Codezee Solutions Pvt. Ltd.

Android Developer | Jan 2026 – Present

- Develop Android applications using Kotlin, Jetpack Compose, MVVM, Hilt and Koin.

- Design and implement reusable UI components using Jetpack Compose and Material Design.
- Integrate and maintain Google AdMob advertising solutions including Banner, Interstitial and Native Ads.
- Integrate REST APIs and handle asynchronous operations using Coroutines, Flow and Retrofit.
- Work on application architecture, debugging, performance optimization and production issue resolution.
- Collaborate with designers and developers to implement new features and improve existing functionality.

Freelance Android Developer — Part time

Feb 2025 – Present

- Developed Android applications using **Kotlin, Jetpack Compose, MVVM, Hilt and Koin**.
- Integrated **Google AdMob** into Android applications.
- Implemented application features based on client requirements.
- Worked on API integration, UI development and application maintenance.

Hevin Tecnoweb

Android Developer | Apr 2025 – Oct 2025

- Developed Android application using Kotlin, MVVM Architecture and Hilt
- Optimized database and ContentResolver queries for efficient retrieval of device messages.

Grow Solutions

Android Developer | Dec 2023 – Jan 2025

- Developed a responsive Android application using Kotlin with the Navigation component, MVVM Architecture and Hilt
- Integrated Google ML Kit into an Android application.

HK Apps

Android Developer | May 2023 – Oct 2023

- Developed Android application features using Kotlin and Android SDK.
- Implemented UI screens and application functionality based on project requirements.

Monarchy Infotech

Android Developer | Feb 2022 – May 2023

- Developed a responsive Android application using Kotlin with the Navigation component, MVVM Architecture and Hilt
- Collaborated with a team of 3 to implement a RESTful API using Retrofit

SELECTED PROJECTS

Faceless Reel–AI Video Creator

<https://play.google.com/store/apps/details?id=com.faceless.reelmaker>

Tech: Kotlin, Jetpack Compose, Koin, AI APIs

- Developed an AI-powered Android application for creating and editing short-form videos/reels.
- Built the UI using **Jetpack Compose**.
- Implemented application architecture and dependency injection using **Koin**.
- Integrated AI functionality into the Android workflow.

AI Photo Editor: Magic Eraser

<https://play.google.com/store/apps/details?id=com.aieditor.app>

Tech: Kotlin, MVVM, Hilt, AI API

- Developed an AI-powered photo editing application.
- Implemented image upload and API integration for AI-generated image processing.
- Built application architecture using **MVVM and Hilt**.
- Implemented image editing functionality using Canvas.

Music Player - Audio & Video

<https://play.google.com/store/apps/details?id=com.mplayer.audioplayer.app.music>

Tech: Kotlin, MVVM, Hilt, MediaStore, MediaPlayer/ExoPlayer, MediaSession

- Developed an Android music and video player for managing media stored on the device.
- Integrated **MediaStore** to retrieve and manage local audio/video content.
- Implemented playback functionality with background playback support.
- Developed media notification and playback controls.
- Implemented queue, playlist and favorite-song functionality.
- Applied **MVVM architecture and dependency injection** for maintainable code.
- Optimized media loading and UI performance.

AI Photo Generator: PicJourney

<https://play.google.com/store/apps/details?id=com.picjourney.ai.avatar.generator.photo.maker>

- Developed an AI-powered photo generation application using Kotlin, MVVM, Navigation Component and Hilt.
- Integrated image upload and API communication to generate AI-powered images.

BayRide

- This is a Taxi booking service app for a US client in my first company. I worked on the Login and Signup flow using API

Message

- Manage all messages with more features like schedules, pinned, starred and backup & restore messages.

Trading Tips - Stock, Breakout

<http://play.google.com/store/apps/details?id=com.tips.trading.stockbreakout>

- Developed Android features for charts, stock results and notifications.

EDUCATION

- **Android Development Course**
Red & White Multimedia Education
- **Higher Secondary Certificate – GSEB**
